

Delloch HipFit

The Perfect Fit

**We're all different - but with Delloch
protection, everyone gets the perfect fit!**

Delloch[®]
HIP PROTECTION

The Perfect Fit

We're all different shapes and sizes, we're not just flat or round. In a category of one-size-fits-all, other hip protectors rely on either large, bulky pads or compromise pad positioning.

Delloch HipFit is different. We know that one size does not fit all and the key to comfort is the perfect fit. That's why HipFit is the world's first hip protector with a pad positioning system and body conforming pads.

Perfect Positioning

We're not only different on the outside; anatomically we're different on the inside.

HipFit caters for greater trochanter variance with a unique pad positioning system ensuring the protection is in just the right place.

The patented HipFit POSITION system sets Delloch apart. The quick and simple system accurately aligns the pad, whatever the hip bone position or however the undergarment is worn.

Delloch HipFit

The Next Generation in Hip Protection

Delloch HipFit is an innovative new hip protection system that achieves outstanding comfort and provides ultimate protection against hip fracture through being engineered to fit the body.

High-performance body conforming pads adjust to different hip bone positions for an invisible safeguard. HipFit provides the reassurance people need to continue an active and healthy lifestyle.

It's all about comfort

To feel confident, people have to feel comfortable. The undergarment's soft cotton-rich textiles and tailored cut fit the body perfectly for outstanding all-day comfort.

Shape matters

The HipFit pads feature a naturally shaped form derived from extensive anthropometric design research. The patented design conforms perfectly to the body remaining discreet under clothing.

Impact Protection

Delloch offers two high-performance HipFit pads to meet everyone's needs. Extensively tested and internationally approved, both provide ultimate protection.

Soft Shell Protectors
% of Force Reduction in Event of a Fall

HipFit ACTIVE

This dual-density, ultra lightweight foam pad is the ultimate soft-shell hip protector.

Hard Shell Protectors
% of Force Reduction in Event of a Fall

HipFit PLUS

This ultra slim-line reinforced polymer shield with a soft inner foam layer is the ultimate hard-shell hip protector.

Disclaimer: The Delloch Hip Protection System is designed to help prevent a fall related hip fracture. It is important that all the procedures for applying the pad in the correct position as outlined in the Quick Guide are followed in order to prevent a hip fracture as a result of a fall. However while this system can help lessen the severity of the impact of the fall, it does not guarantee that this will prevent a hip fracture.
